Scripting in Python Specialization

Coursera

PROFESSIONAL PROFILE

Practical engineering for systems where correctness and reliability matter.

Full-stack software engineer with 4 years of professional experience across Laravel, PHP, Node.js, React, MySQL and AWS. Strongest in backend architecture, data integrity, payment workflows, legacy modernization and production support for business-critical applications.

PROFESSIONAL EXPERIENCE

01

Backend Developer

2022 - Present

MBR Computer Consultants

- Develop and maintain backend services for judiciary, HR, finance and operational applications.
- Design REST APIs and data workflows consumed by React and Flutter client applications.
- Improve legacy code safely while protecting production data and established business rules.
- Deliver authentication, file-processing, payment, reporting and AWS integration workflows.

02

Full-Stack Developer

2020 - 2022

Boldinks Technology Solution

- Built and supported end-to-end web applications across backend, frontend and database layers.
- Implemented secure authentication, reusable services and performance improvements.
- Improved testing practices and supported production releases, debugging and customer-facing changes.
